PROFESSIONAL SUMMARY

Full Stack Developer with 6+ years of experience, specialized in frontend development and hybrid mobile technologies. Strong background in React, Vue, Angular, Node.js, and NestJS, with proficiency in mobile frameworks such as Ionic, React Native, and Capacitor. Proven track record leading database migrations, implementing microfrontend architectures, and modernizing legacy systems. Co-founder of a SaaS product focused on user experience and scalable interfaces.

RELEVANT EXPERIENCE

Frontend Developer — GlobalTask | 2023 – August 2026

- Developed anti-money laundering (AML) prevention portals using a microfrontend architecture.
- Implemented the frontend using React.js + Redux.
- Implemented client-side security using RSA and AES encryption algorithms.

Fullstack Developer — GlobalWizzards | 2022 – 2023

- Built new functionality for an Extended Detection and Response (XDR) product, with log processing on both backend (Golang) and frontend (Vue 3).
- Developed frontend for lottery games using Phaser 3; optimized and organized assets with Texture Packer.

Backend Developer — GlobalTask | 2021 – 2022

- Led the migration of services from QLDB to DocumentDB, developing new services with NestJS.
- Implemented encryption and decryption processes to ensure information security.

Full Stack Developer (Freelance) | 2019 – 2021

- Built a condominium management app with facial recognition (Azure) for access control, security patrol rounds, surveys, and deliveries.
- Developed a real estate management system.
- Developed a logistics system for package shipping and transportation.
- Developed an event management system.

Fullstack Developer — Liderlogo | 2016 – 2019

- E-commerce on WordPress and custom systems using Angular, Vue, and Node.js.
- Optimized functionality and integrations to grow the e-commerce channel.

PERSONAL PROJECTS

MerakiPOS — Co-founder & Frontend Lead | meraki.com.ve

Multi-branch point-of-sale SaaS system for Venezuelan businesses. Modernized a legacy CodeIgniter (PHP) codebase using Alpine.js and Tailwind CSS. Features: centralized inventory, independent per-branch sales, roles and permissions, web catalog, and USD/Bs multi-currency support.

Design System Generator | michelnovellino.github.io/design-system-generator

100% client-side tool built in Vue to generate perceptual color scales (OKLCH), validate contrast against WCAG 2 and APCA, generate fluid typography, and export design tokens (CSS variables, Tailwind config, DTCG).

TECHNICAL SKILLS

Frontend: React.js, Redux, Vue.js, Angular, Alpine.js, Tailwind CSS, JavaScript, TypeScript

Mobile: Ionic, React Native, Capacitor

Backend: Node.js, Express, NestJS, Golang, PHP (CodeIgniter)

Databases: MongoDB, DocumentDB, PostgreSQL, MySQL

Cloud/DevOps: Docker, Nginx, AWS (S3, EC2), Azure

Other: Microfrontends, Design Systems, WCAG Accessibility, RSA/AES Security

EDUCATION

Senior Computer Technician — Instituto Universitario Del Estado Bolívar (2014 – 2018)
